Weekly Weather Forecast

Weekly Outlook - 24 January 2017

Temperature

Figure 1: Mean surface temperature from Tuesday 24 January to Wednesday 1 February 2017.

In the coming week, extremely hot conditions, 28°C and higher are expected over the northern and central parts of the Northern Cape. The rest of South Africa will experience temperatures between 18 to 24°C.

Note:

Temperatures reflect daily average temperatures over an 8 day period.

Figure 2: Temperature anomaly for Tuesday Tuesday 24 January to Wednesday 1 February 2017.

Colder than normal temperatures are expected over most parts of South Africa except parts of the Northern Cape and eastern Limpopo. Temperatures along the coastal regions will be normal for this time of year.

Temperature forecasts from the **National Centers for Environmental Prediction**.

Normal Temperature derived from CRU monthly climatology for 1901 – 2000

Rainfall

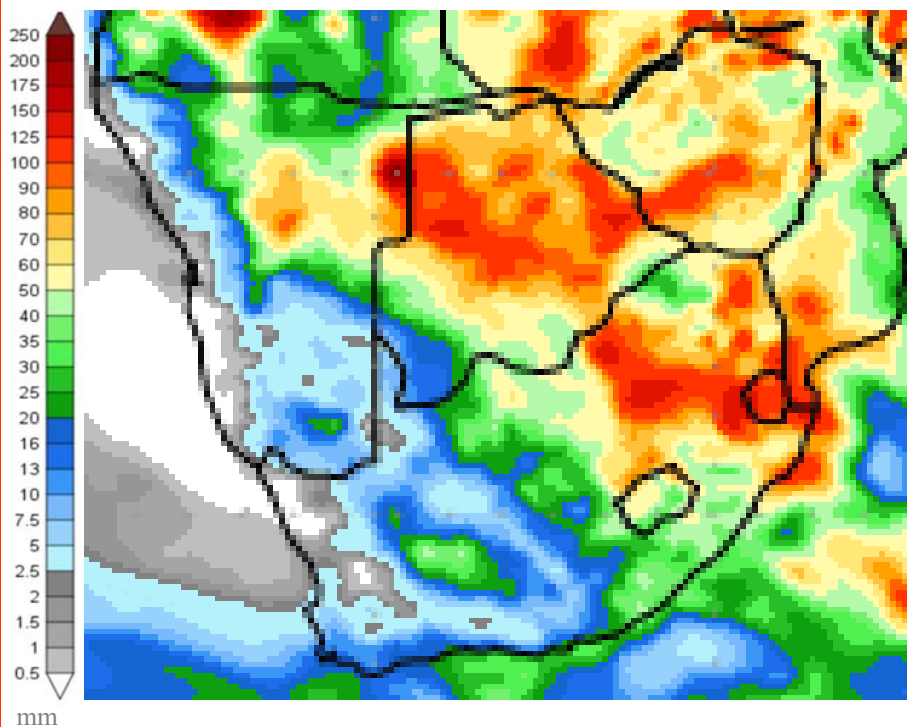

Figure 3: Precipitation for Tuesday 24 January to Wednesday 1 February 2017.

A wet week is expected for most of South Africa except the west coast. Rainfall over the summer rainfall regions will be the highest with between 30 up to 100mm being expected. The central Karoo will receive up to 30 mm with the rest of the cape provinces receiving up to 10 mm.

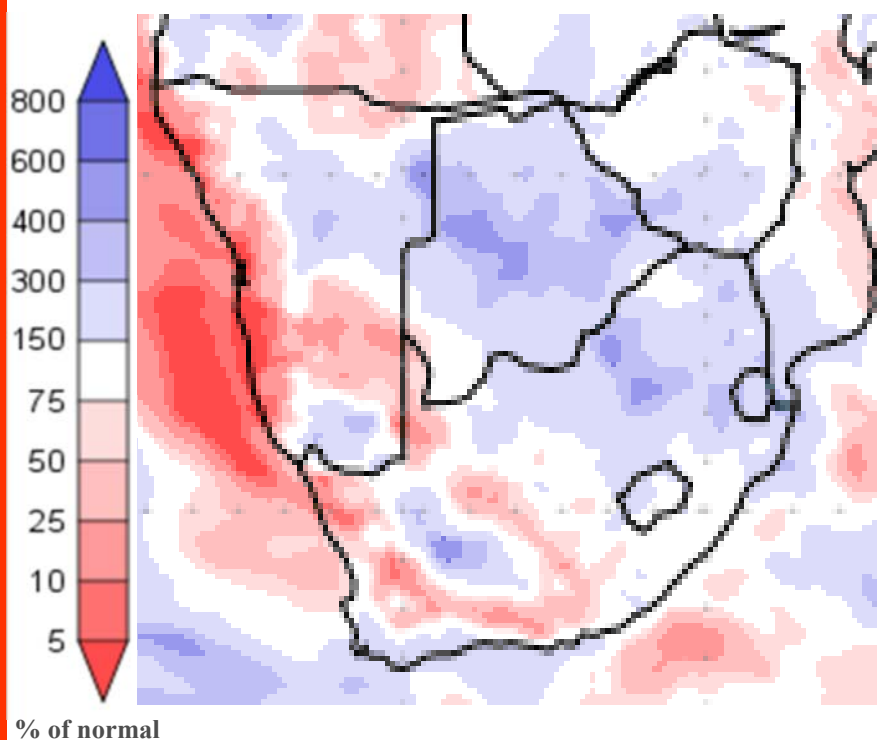

Figure 4: Precipitation (% of normal) for Tuesday 24 January to Wednesday 1 February 2017.

Higher than normal rainfall is expected over most of the summer rainfall region as well as the central Karoo. The rest of the country will receive normal rainfall with the western coast remaining dry.

Precipitation forecasts from the **National Centers for Environmental Prediction.**

Normal rainfall derived from CMAP monthly climatology for 1979 – 2003
